## E-learning Platform

### Graduation Project 2022

Mansour Ashraf Sobh  
Essam Mohamed Rezk  
Nada Ibrahim Mohamed  
Ahmed Mohamed Mansour

Abdullah Mohammed Shalabi  
Omar Emad-Eldeen Abo-Deaf  
Kareem Magdy Loulah  
Amr Ahmed Megahed

Under Supervision of  
Dr/ Soha Mohamed Dr/ Mohamed Elaskily

What is the Project  
about

# What is the project?

E-learning platform for people of a variety of ages

planning to make an "easy-to-use" website for people of different ages.

# Why this Project?

We started thinking about project that will be useful in several ways after the COVID-19 pandemic

- ☐ Useful for society
- ☐ Solve problem
- ☐ Useful for us after graduation

What is the Project  
about

Who else provides this  
service & differences

# Competitors Platforms

# The difference we made

AI recommended books

Quiz after each lesson

Learning Paths

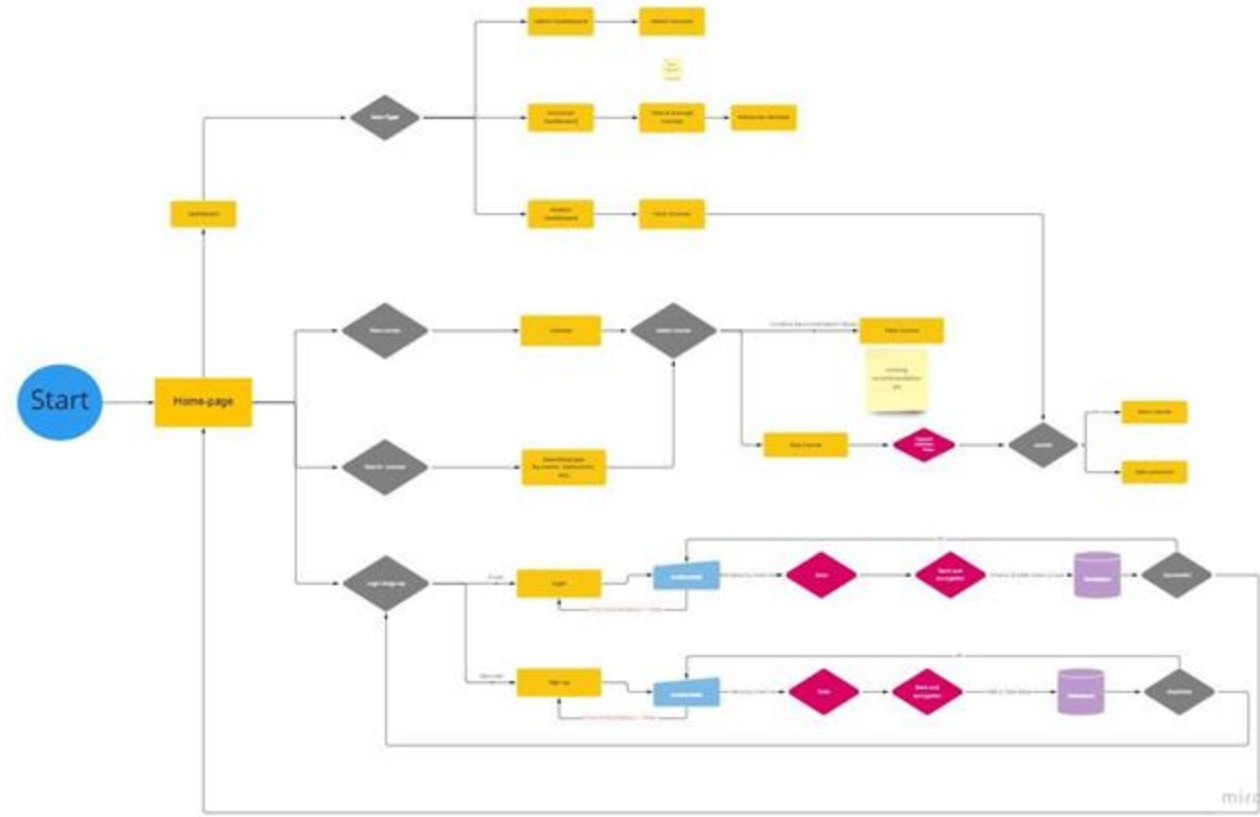

Who else provides this  
service & differences

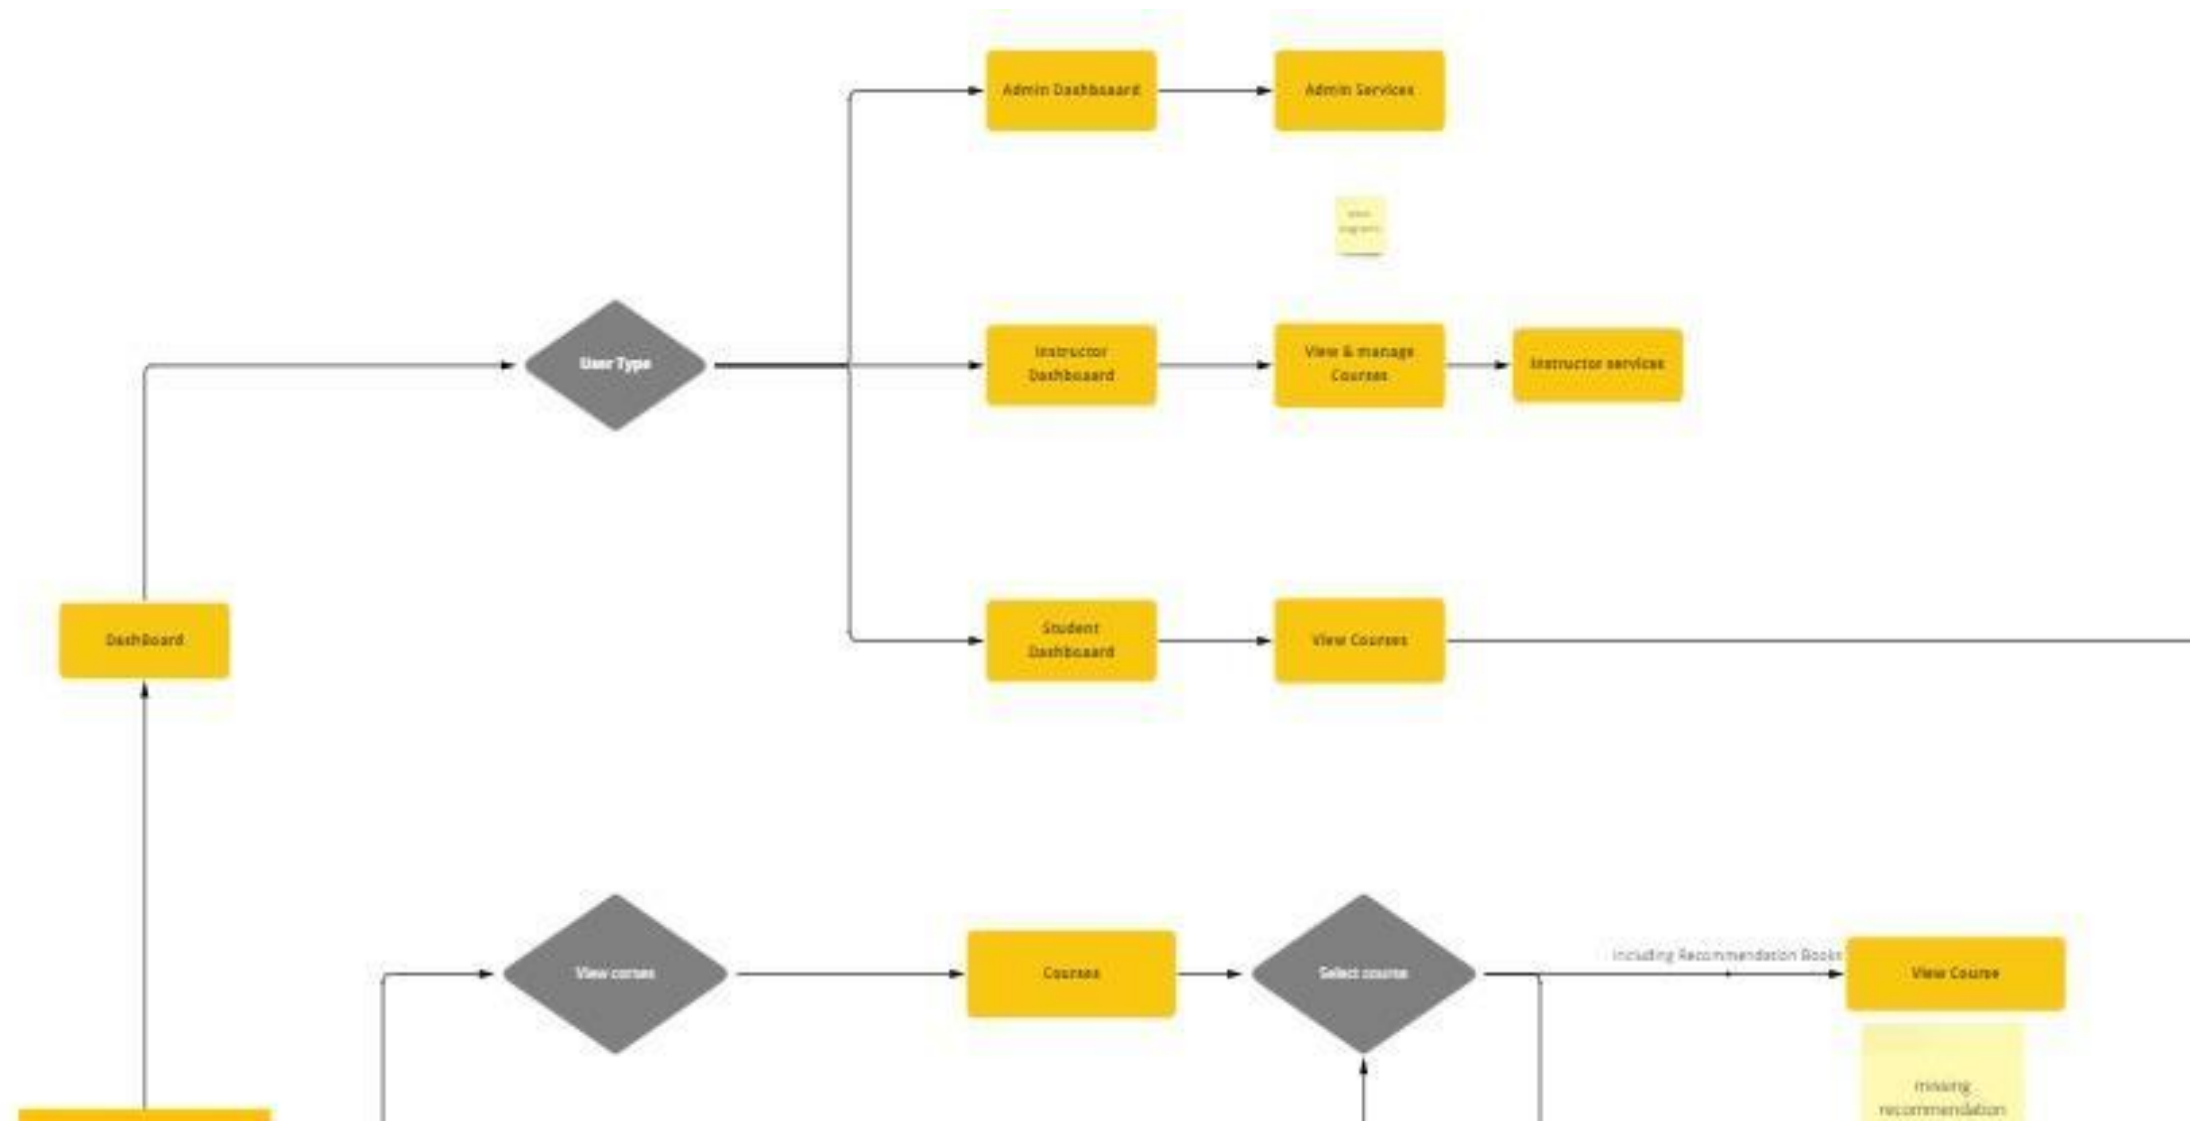

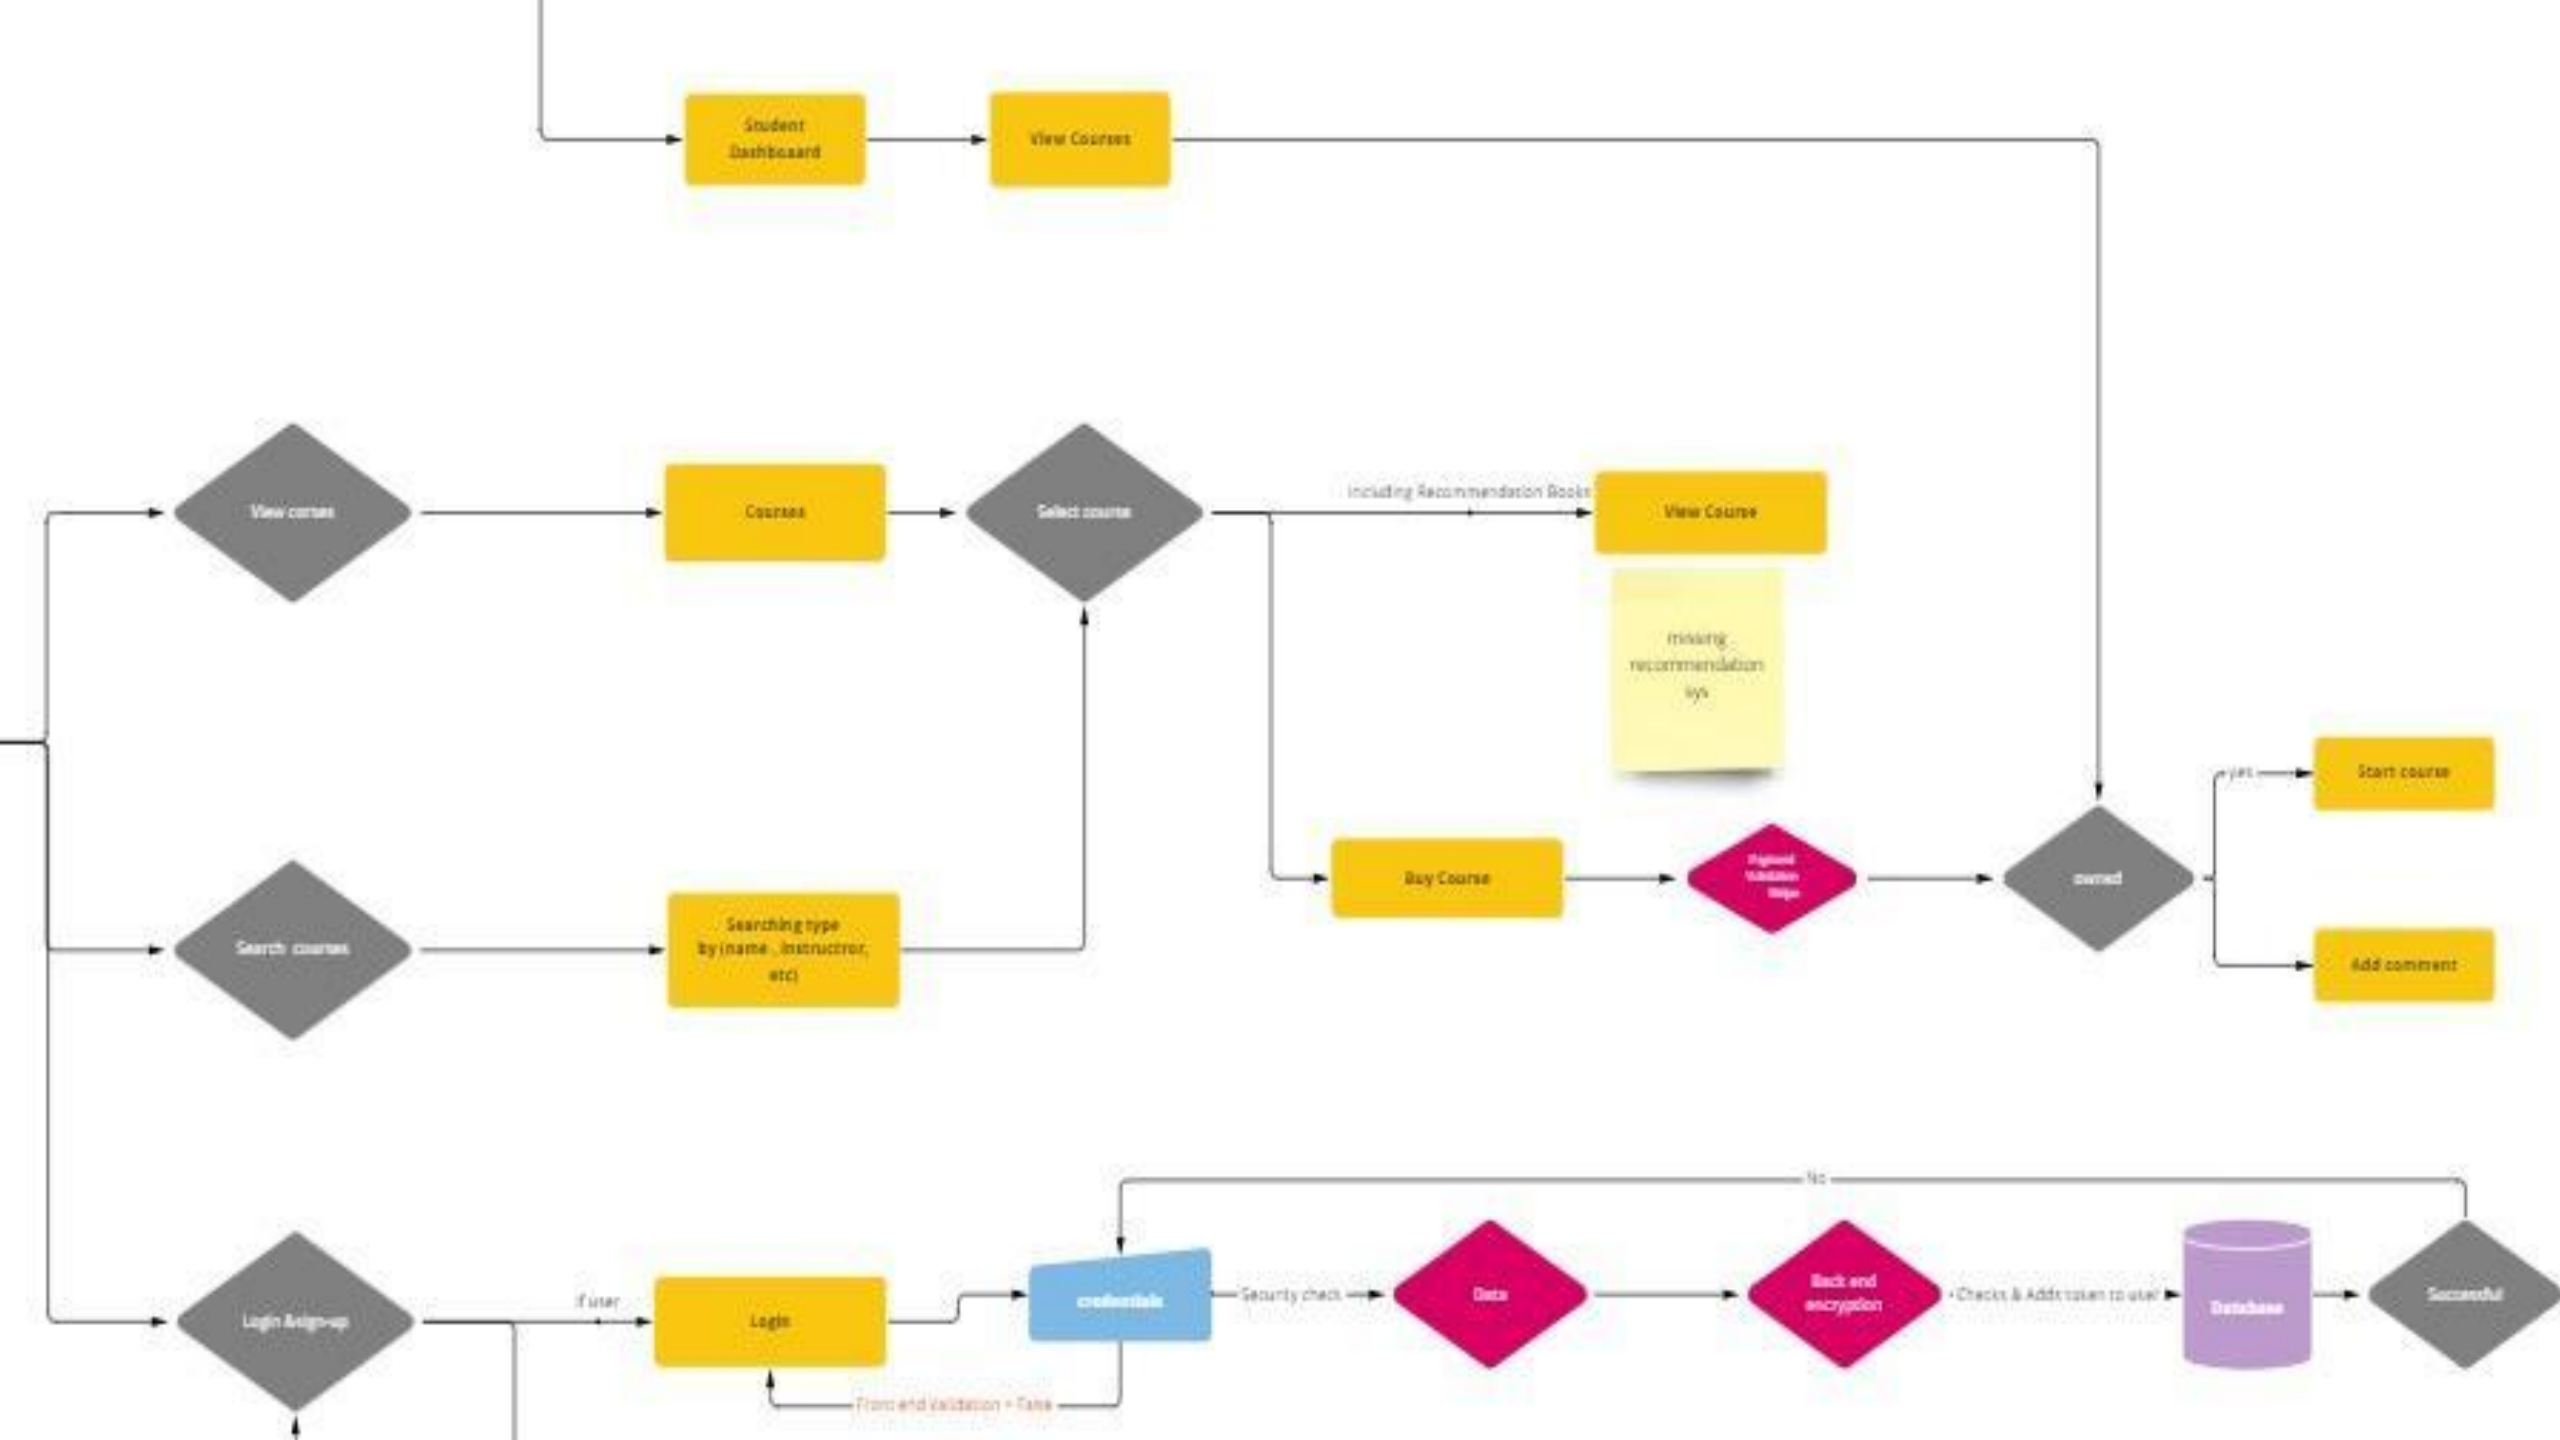

# Modeling

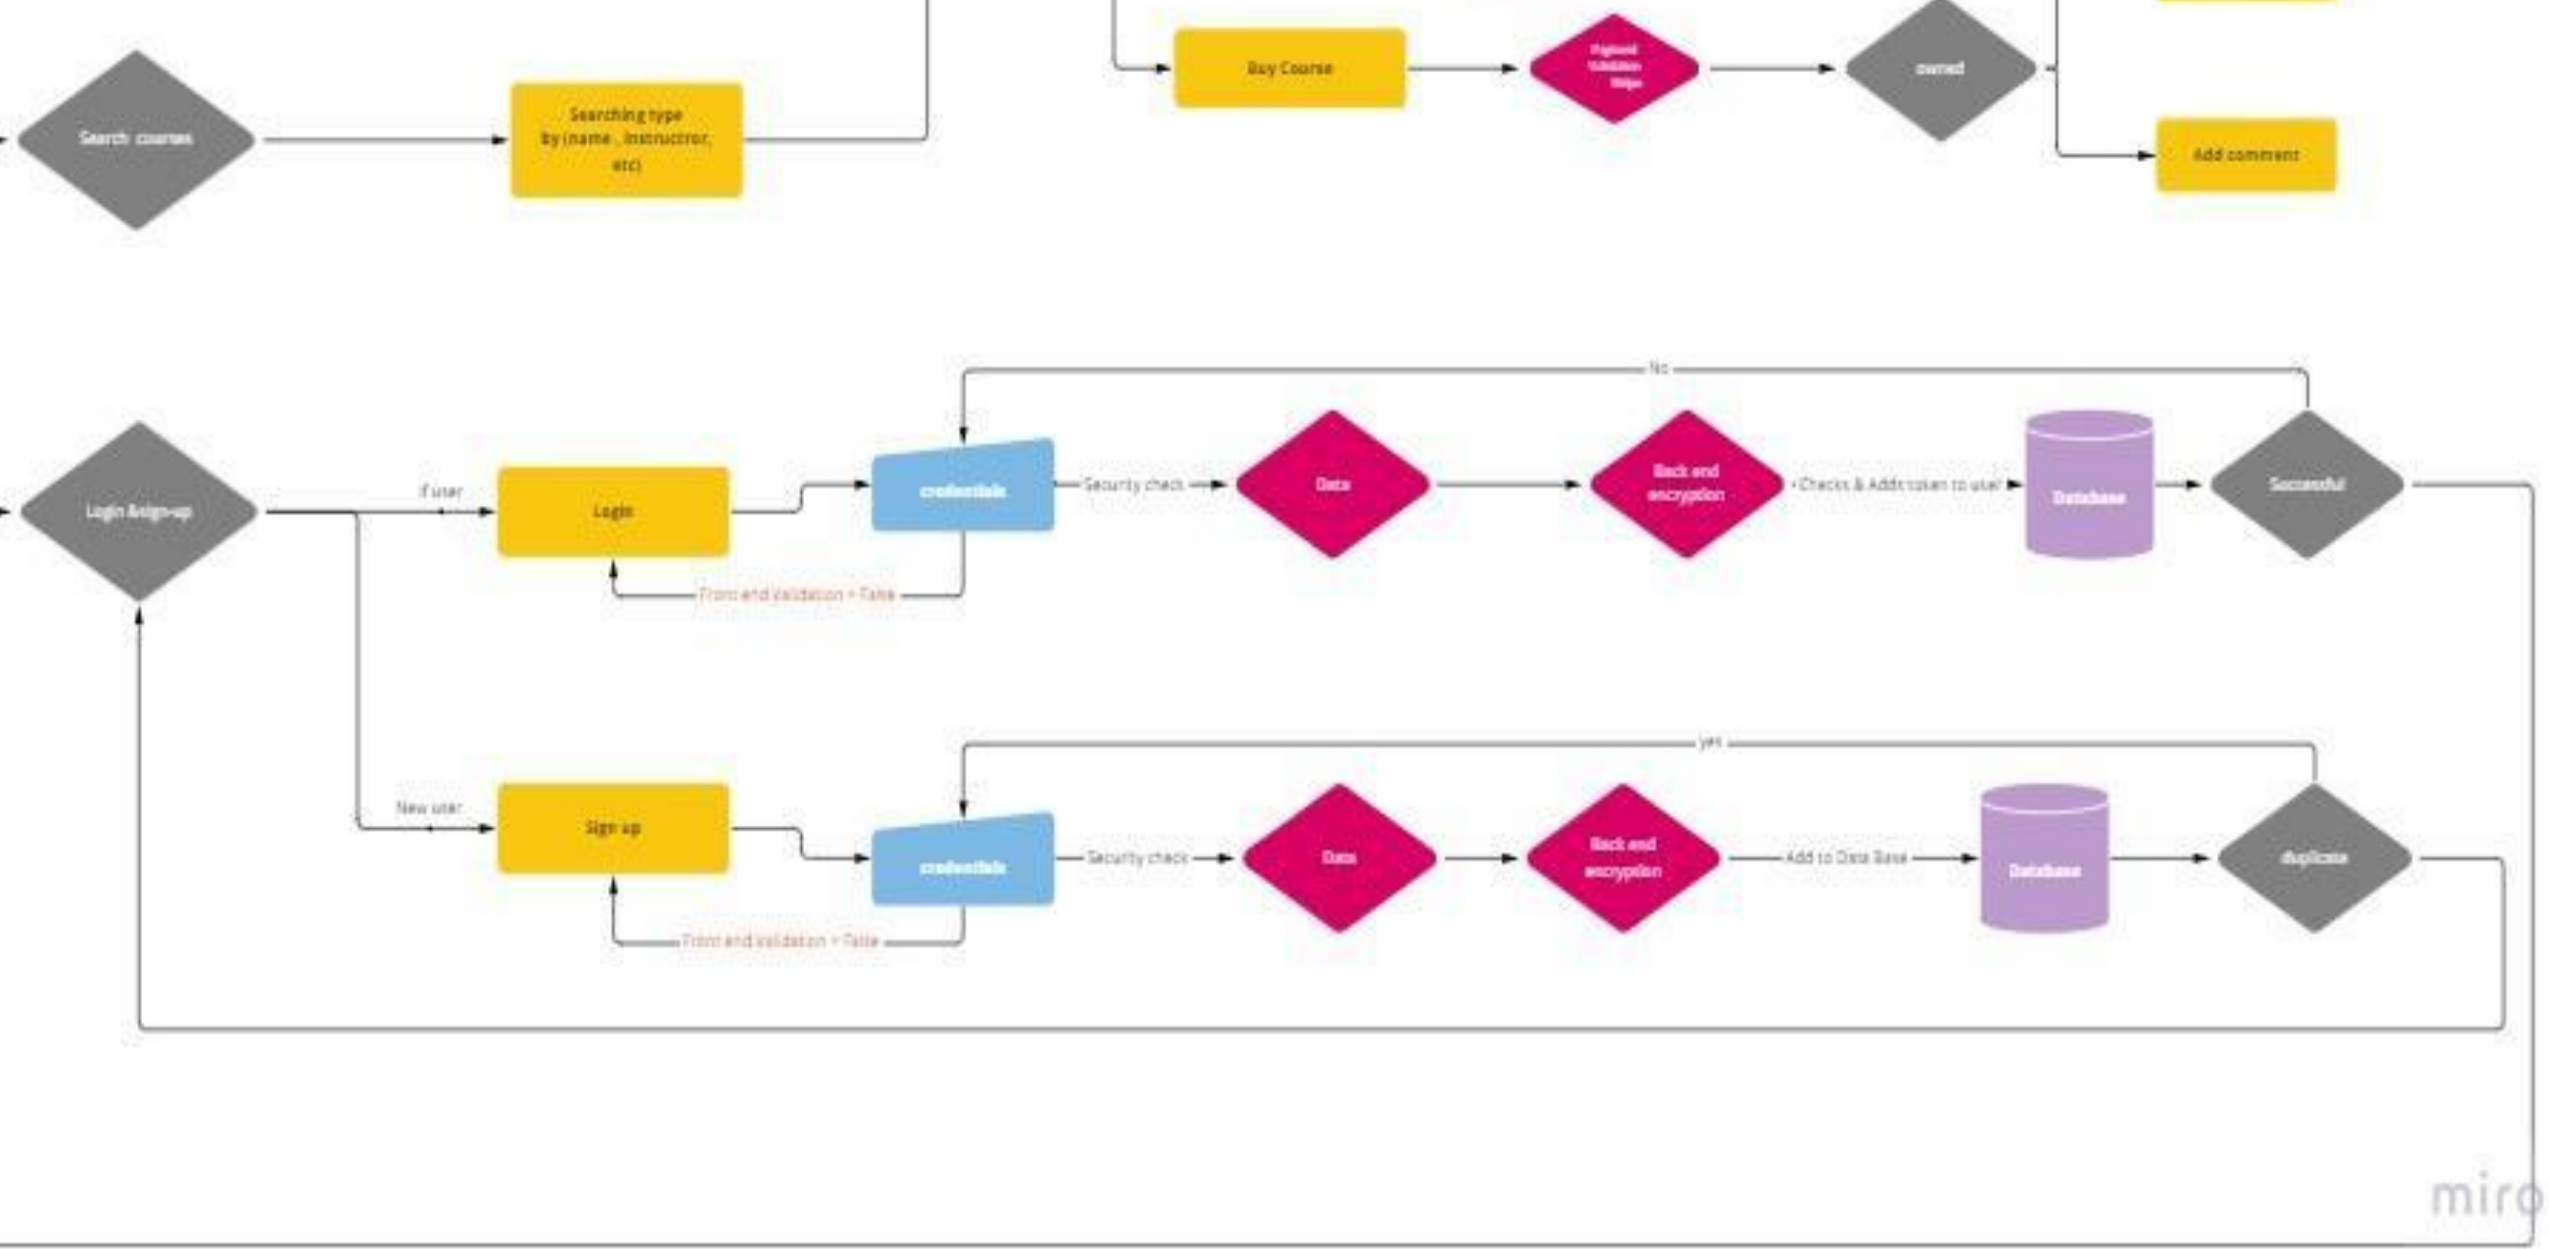

# System modeling

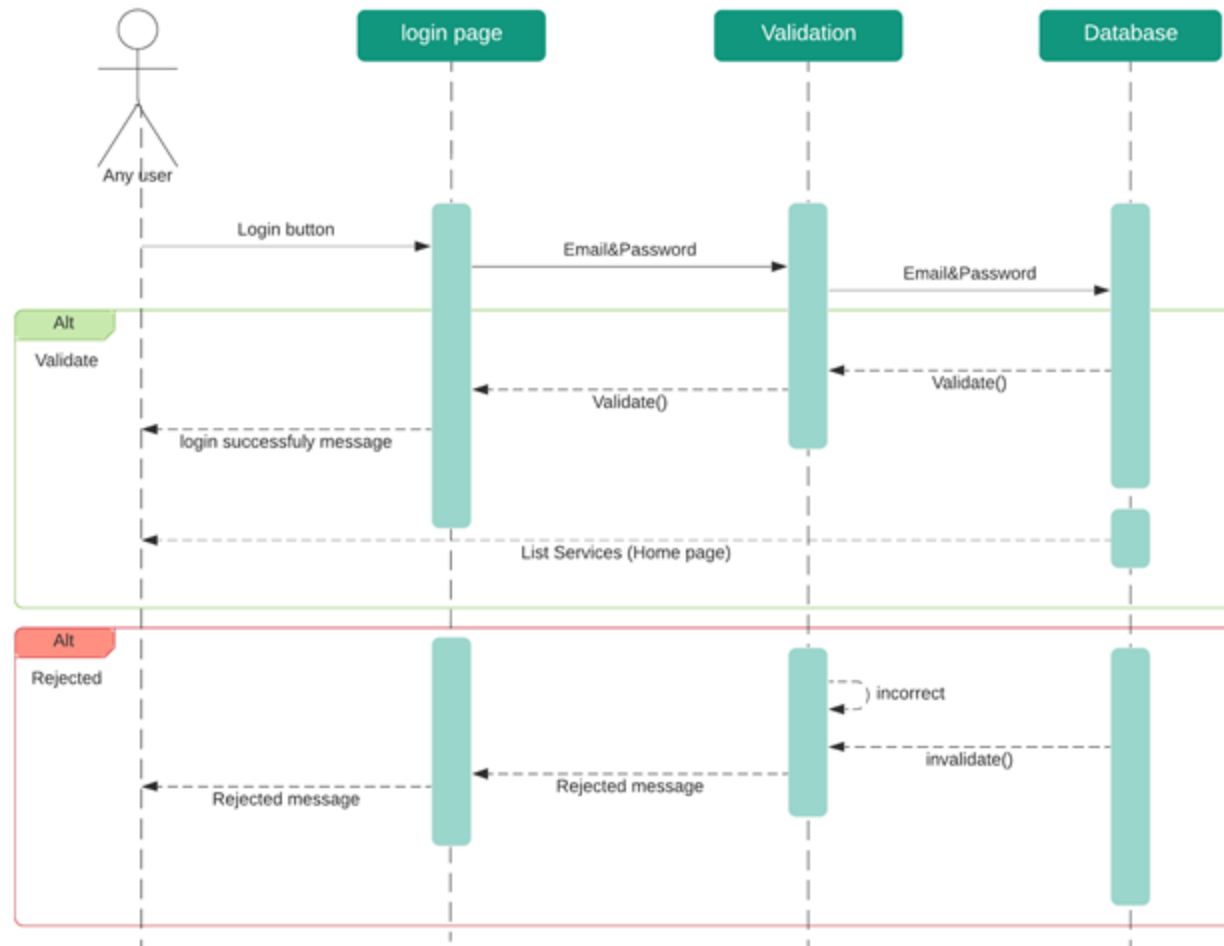

# System modeling

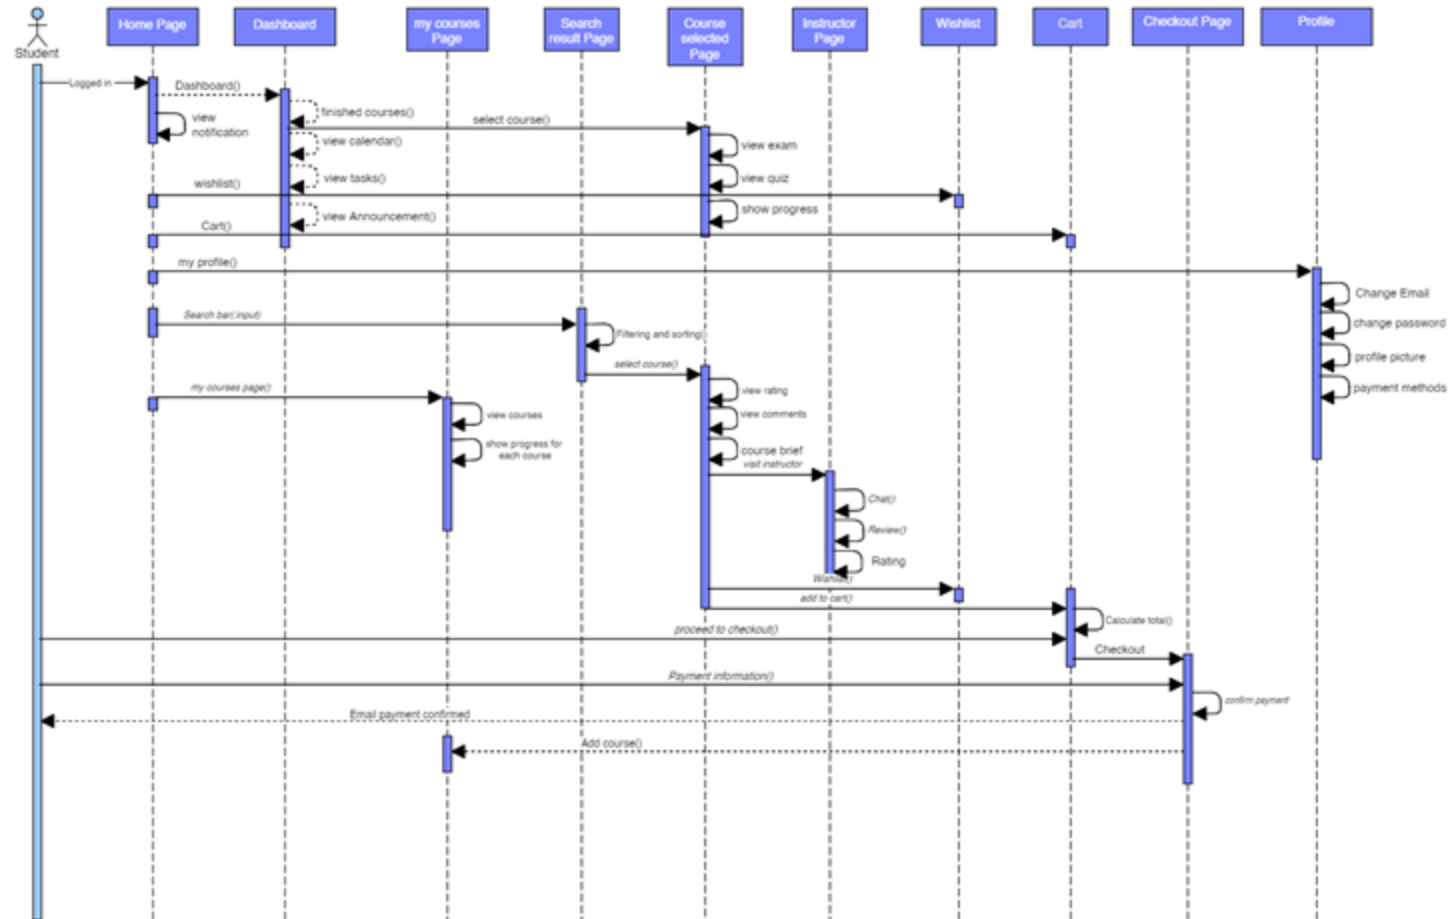

# Context diagram

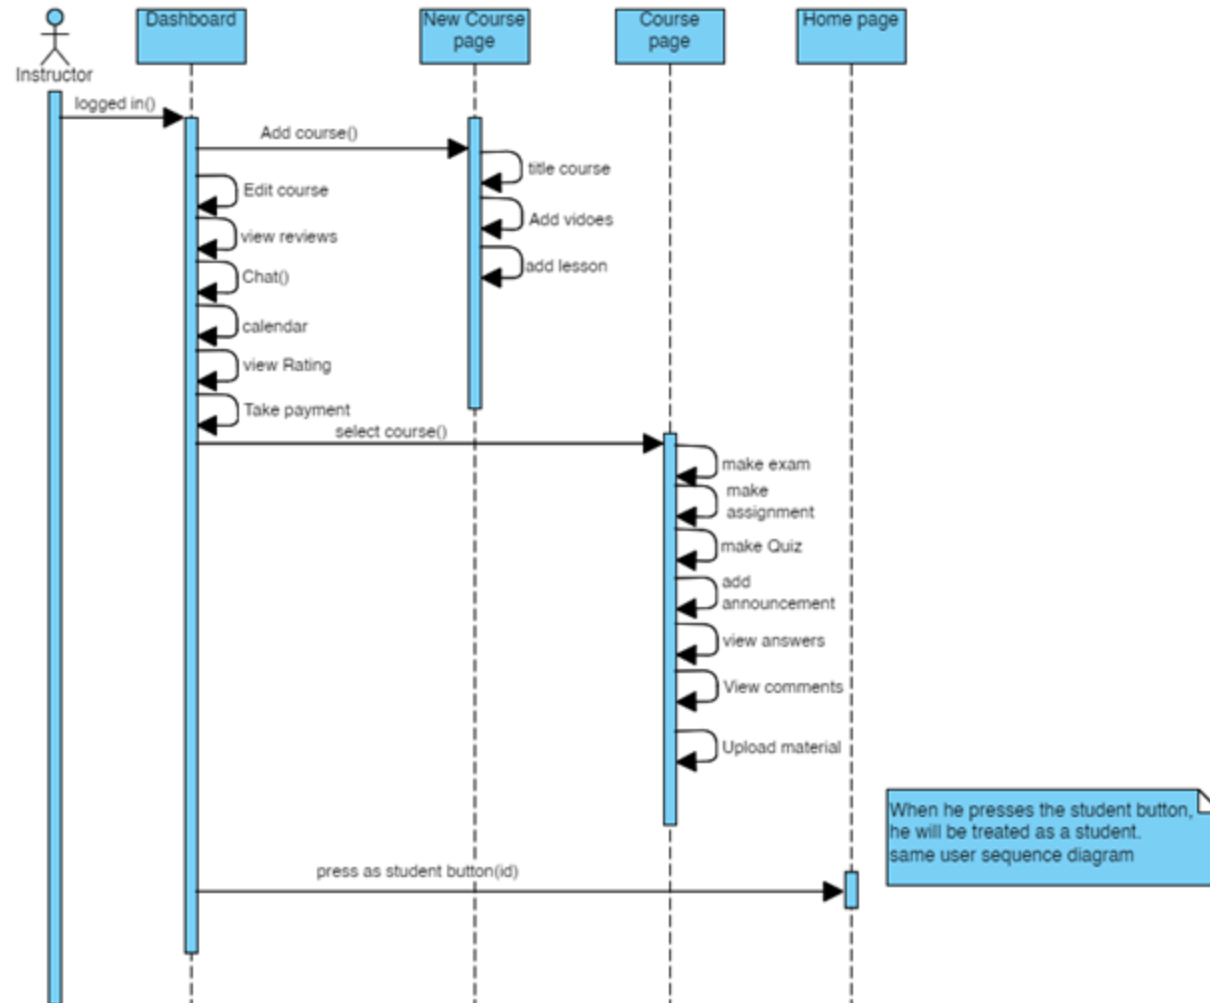

# Login sequence diagram

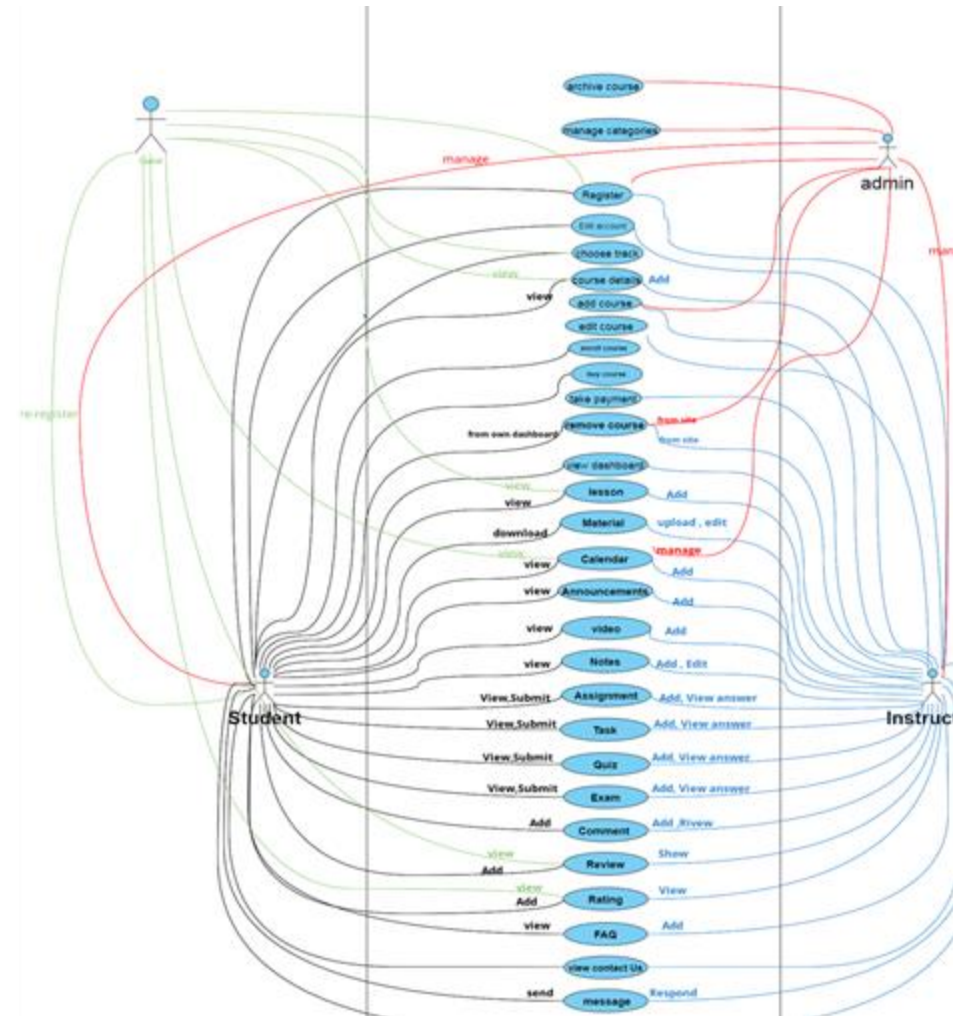

# Student sequence diagram

# Instructor sequence diagram

# Use case diagram

# Modeling

# Methodology

# Front-end

React js is an open-source JavaScript library that is used for building user interfaces

Flexible

Community Support

Easy to test

Next.js is a JavaScript framework that enables you to build superfast and extremely user-friendly static websites

Better SEO

Fast

Increase efficiency

Ant Design is a React UI library that has an excess of easy-to-use components that are useful for building elegant user interfaces

Easy to use

Scalable

Customizable

Bootstrap is the most popular CSS Framework for developing responsive and mobile-first websites.

Time saving

Easy to use

Customizable

# Back-end

Server-side programming, and primarily deployed for non-blocking, event-driven servers, such as traditional websites and back-end API services

Scalable

Easy

Open-source

Express is a minimal and flexible Node.js web application framework that provides a robust set of features for web and mobile applications.

express

HTTP utility

High performance

Most popular

A document-oriented database that stores data in JSON-like documents with dynamic schema.

Flexible

Atlas

Huge transactions

Mongoose provides a straight-forward, schema-based model to your application data. It includes business logic hooks and more, out of the box.

Built-in type casting

Validation

Query building

# 3<sup>rd</sup> Party Services

Amazon Web Services (AWS) is the world's most comprehensive and broadly adopted cloud platform

Flexible

Scalable

Secure

Stripe is a suite of APIs powering online payment processing and commerce solutions for internet businesses of all sizes. Accept payments and scale faster.

Payment

Easy to use

Secure

## Other Packages & Tools

`cors`

`slugify`

`bcrypt`

`redux-form`

`cookie-parser`

`http-proxy-middleware`

`axios`

`react-player`

`jsonwebtoken`

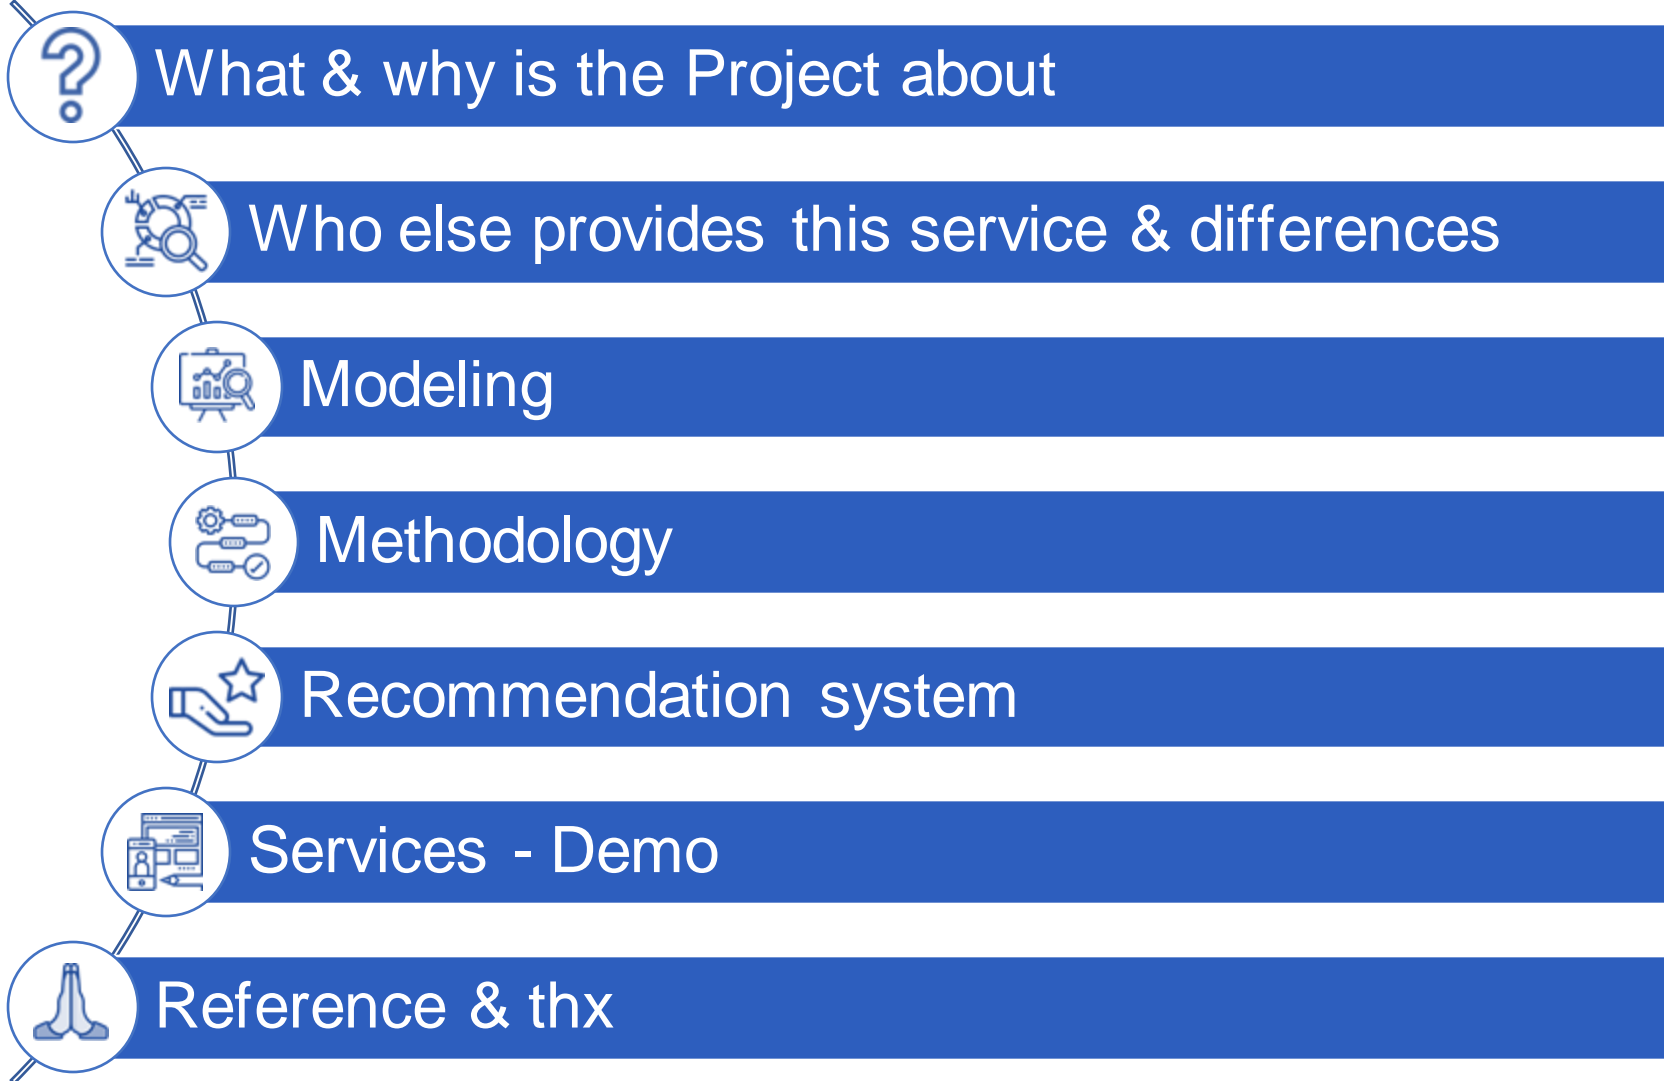

`query-string`

`react-markdown`

`react-toastify`

# Methodology

Recommendation system

**Can the site work without the  
recommendation system?**

---

# Recommendation system in E-learning

What is Recommendation system?

a subcategory of information filtering systems that seeks to predict the rating or preference a user might give to an item. In simple words, it is an algorithm that suggests relevant items to users. For example, when browsing one of the instructional courses, it will suggest some similar courses for you

# Why the Recommendation system?

Benefits users in finding items of their interest.

Help item providers in delivering their items to the right user

# Currently available in this system

Recommend Courses from Courses

# What's new?

Recommend Reference from Courses

# Tools

Natural language processing (NLP) is the ability of a computer program to understand human language as it is spoken and written -- referred to as natural language. It is a component of artificial intelligence (AI).

TF-IDF, or term frequency-inverse document frequency, is a figure that expresses the statistical importance of any given word to the document collection as a whole

Keyword Extraction : is automatic detection of terms that best describe the subject of document

Cosine Similarity Measured by the cosine of the angle between two vectors and determines whether two vectors are pointing in roughly the same direction.

It is often used to measure document similarity in text analysis

# Cos-Similarity

$$\cos 180^\circ = -1$$

$$\cos 90^\circ = 0$$

$$\cos 0^\circ = 1$$

# Other tools

## Flask

Flask is a web framework, it's a Python module that lets you develop web applications easily. It's having a small and easy-to-extend core

---

Stream lit is a free and open-source framework to rapidly build and share beautiful machine learning and data science web apps

## Streamlit

### Tools used for data Analysis

NumPy

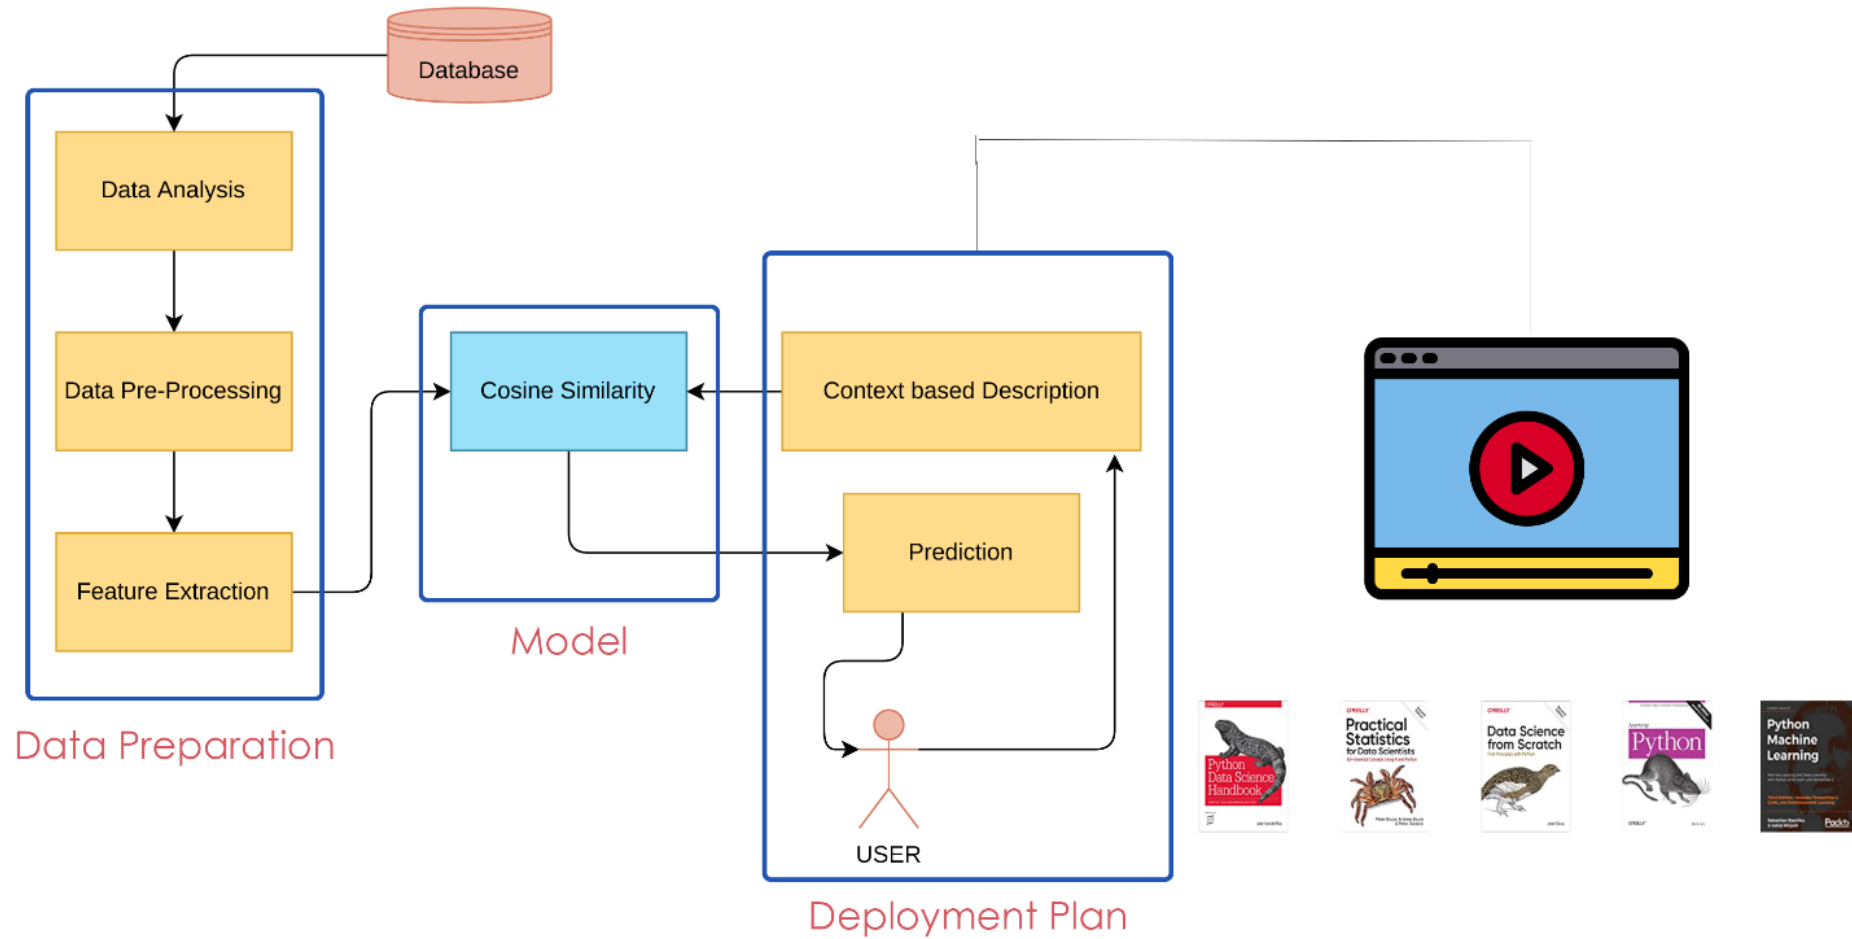

Pandas

### Tools used for data visualization

Matplotlib

Seaborn

## Our platform

for people of a variety of ages containing a lot of categories & fields such as development, designing, finance, etc. we want to reach the most number of people possible and help them reach their goals. We are planning to make an easy-to-use website for people of different ages. Courses are going to be divided into different parts (weeks). Tasks are going to be implemented between videos in the week's section, Quizzes will be made between weeks if applicable by the professor

## Our students

a community of global learners united in a shared goal of uplift and transformation. Our unique learning model enables an unprecedented degree of engagement with our students, and we are with them through every step of their learning journey—from the first moment a marketing team member might answer a question on Facebook, to the penultimate moment when a career team member receives word that a graduate has gotten a new job. Our mantra is Students First, and this is the light that guides us as we continue our mission to bring the highest quality learning possible, to as many students as we can possibly reach.

# Answer Quiz

Question 1:

Why do we need biological neural networks?

**a) to solve tasks like machine vision & natural language processing**

b) to apply heuristic search methods to find solutions of problem

c) to make smart human interactive & user friendly system

d) all of the mentioned

Next

Question 2:

2. What is the trend in software nowadays?

**a) to bring computer more & more closer to user**

b) to solve complex problems

c) to be task specific

d) to be versatile

Next

# Result

You have completed the quiz.  
You got 1 out of 3 questions.  
You scored 1 out of 3.

All

Q1: Why do we need biological neural networks?

a) to solve tasks like machine vision & natural language pro

b) to apply heuristic search methods to find solutions of problem

c) to make smart human interactive & user friendly system

d) all of the mentioned
